WHAT MADE A DIFFERENCE IN 2021? YOU!

THIS LEGISLATIVE SESSION, you went above and beyond, reshaping your activism to fit a physically-distanced new world. When you couldn’t show up at the Capitol in person, over 200 of you showed up for our first-ever virtual Lobby Day over Zoom. And you didn’t stop there. You published letters to the editor in support of the Oregon Clean Energy Opportunity, sent postcards to legislators, and joined virtual phone banks. You sent over 20,000 emails to lawmakers, demanding protection for Oregon’s people and places. You attended digital events, like the Youth Round Table with Legislators organized by our amazing interns.

When we join together as a community to fight for what we believe in, nothing can stop us—not even a pandemic. We’re so grateful to have creative, dedicated, and passionate volunteers like you standing up for Oregon’s future alongside us.

THANK YOU!

ANDREW WELLINES, 2021 OLCV PHOTO CONTEST PARTICIPANT AND WINNER
THE 2021 LEGISLATIVE SESSION was unique. Certainly the pandemic will be front and center, along with the memories of our Capitol’s hallways empty and constituents testifying via computer screen. But, the Session will also be defined by the increasing impact climate change is having on our health, our families, our communities, and our state.

At the beginning of the 2021 Legislative Session, we saw a record-breaking ice storm that left hundreds of thousands without power for days, and, at the end, we saw a record-breaking heat wave that left hundreds dead and the whole state sweltering. We remain in a dangerous, sustained drought, and we have now added a fifth season to the calendar: wildfire smoke season. Could the need for climate action be any more clear?

Heading into the 2021 Legislative Session, climate change was certainly at the top of our list of key priorities. The Legislature agreed, and together with our champions, partners, and advocates, we saw an entire suite of climate legislation pass, including legislation that requires 100% Clean Energy by 2040.

In the wake of the devastating wildfires of 2020, working to protect homes and communities was high on the list as well, and there, too, we saw important legislation pass. In fact, there were wins across several key areas, though most importantly on the budget. For the first time in many Legislative Sessions, we saw significant additional investment in key state agencies. However, we still saw too many excellent bills and concepts left by the wayside. And again in 2021, we saw powerful interests derail key environmental priorities, including reforming the Oregon Forest Resources Institute, protecting farmworkers from heat and poor air quality, and an expansion of the Toxic Free Kids Act.

Since the 2021 Legislative Session wasn’t marred by walkouts to stop action on climate like in 2019 and 2020, we are able to return to our normal scorecard format this year. We also had more votes to score than in many recent Legislative Sessions, which is another positive sign that our work is having an impact.

Climate, the environment, and justice are important issues, and I’m glad the legislature is giving them the attention they need—and deserve. And for that, I thank you for your support, engagement, and activism. OLCV members, volunteers, partners, and allies have made this possible through hard work and persistence.

It’s never easy, but together we make great things possible.

Doug Moore
OLCV Executive Director
WE WON BIG ON CLIMATE LEGISLATION

THE BIGGEST ENVIRONMENTAL VICTORY coming out of the 2021 legislative session was the passage of three major climate change bills including 100% Clean Energy for All (HB 2021), Healthy Homes (HB 2842), and the Energy Affordability Act (HB 2475).

The time was right for major climate change policy—a year after the Governor’s historic climate executive order we needed a big win to keep the momentum going on strong climate change policy to pave the way for a just transition to a clean energy future. It was time for 100% Clean Energy and the Legislature delivered. Oregon’s 100% Clean legislation is one of the strongest in the nation because it prohibits any new fossil fuel infrastructure, has strong labor standards, and one of the fastest timelines to get to 100% clean energy—aiming to get to 100% clean by 2040. Oregon’s 100% Clean bill is also strong on environmental and economic justice, including requiring the state to consult with Tribes impacted by clean energy projects, and strong protections for ratepayers.

TOGETHER WE WIN

THESE THREE major climate bills were part of the Oregon Clean Energy Opportunity (OCEO) campaign led by frontline and environmental justice organizations from across the state, including the Just Transition Alliance, Verde, and many others. This historic effort led to historic outcomes—passing legislation that acknowledged the disproportionate impacts of climate change on frontline communities and ensuring that those communities are part of the solution as we transition to a clean energy future.

We at OLCV along with our fellow environmental and conservation groups, labor groups, utilities, and others joined the OCEO campaign to help ensure that energy would remain affordable to low income families with HB 2475, and that funding would be made available to families to upgrade their homes to make them safer, healthier, and more energy efficient with HB 2842. In addition to the broad coalition of groups working to pass these bills, hundreds of volunteers from across the state made phone calls, showed up (virtually) to lobby, sent postcards, and published letters to the editor in their local newspapers to make these victories possible.

Passing the full OCEO package of bills proves that when efforts to pass meaningful legislation are led by frontline communities along with a broad base of support, we can truly accomplish transformative policy.
This year had an incredible lineup of freshman legislators. Two that stood out on our environmental priorities were Reps. Dacia Grayber and Andrea Valderrama. Rep. Grayber brought her expertise on wildfire to the intense and ultimately victorious effort to pass a comprehensive wildfire bill. Rep. Valderrama hit the ground running after getting appointed to the legislature mid-session. She got up to speed fast and helped 100% Clean and OFRI get through a key committee. Both representatives earned a 100% score on the OLCV scorecard.

Environmental Champion of the Year

Rep. Pam Marsh (D-Ashland)

At the start of session, Rep. Marsh suddenly became the chair of the House Energy and Environment Committee, a post she had not anticipated. Rep. Marsh rose to the occasion and helped pass some of our biggest priorities in the 2021 session. She played a crucial role in getting 100% Clean Energy legislation through her committee by shepherding it through a complicated and often fraught amendment process, and she ultimately carried the historic bill to the floor.

Most Valuable Player

Rep. Khanh Pham (D-Portland)

In her first term, Rep. Pham demonstrated that she is a true champion. She really shined in her support of 100% Clean Energy (HB 2021), and our Oregon Forest Resources Institute Reform bill (HB 2357), helping ensure both bills passed the House. While OFRI didn’t make it through the Senate, Rep. Pham’s leadership definitely helped it succeed in the House. Her efforts on a variety of environmental bills made it clear that she will always step for the environment.

Perseverance Award

Rep. Andrea Salinas (D-Lake Oswego) and Sen. Jeff Golden (D-Ashland)

Passing large comprehensive pieces of legislation is hard—few know this as well as Senator Jeff Golden, who worked tirelessly to pass comprehensive wildfire legislation requiring the state to be better prepared and more resilient in future wildfire seasons. Transformative legislation that takes on powerful special interests is tough to pass, but that didn’t prevent Rep. Salinas from pushing her bill to reform the Oregon Forest Resources Institute forward. The bill initially set out to eliminate the agency, then was reduced to reformation. Unfortunately, despite her strong leadership, HB 2357 didn’t pass in the Senate. We thank both of them for their leadership and perseverance on transformative legislation.

Unsung Heroes

Rep. Dan Rayfield (D-Corvallis) and Sen. Kathleen Taylor (D-Portland)

A lot goes on behind the scenes to make sure that important bills get through, and to ensure that key programs get funding in the state’s budget at the end of the day. This challenging work within the powerful Ways and Means committee often goes unnoticed or unappreciated. This year we want to honor Rep. Dan Rayfield and Senator Kathleen Taylor for their incredible work that led to historically strong funding for the state’s natural resources agencies.

Honor Roll

Check out our scorecard on pages 10-15 to see the 24 Representatives and 11 Senators who earned 100% scores for the 2021 full session.
WHILE WE HAD FOUR SIGNIFICANT WINS THIS SESSION including the Oregon Clean Energy Opportunity package of bills—100% Energy for All, Energy Affordability, and Healthy Homes—and comprehensive wildfire policy, we still had a number of important environmental bills that died due to industry pressure on legislators.

GOOD BILLS THAT DIED

**HB 2357** **OFRI Reform.** Originally, this bill called for the elimination of the Oregon Forest Resource Institute (OFRI) and the redirection of its funds toward climate-smart, scientifically sound forest management. The amended bill reformed the agency by cutting its budget in half and redirecting its funds—including eliminating their advertising budget which they used to mislead Oregonians about the quality of the state’s forest policies. Passed the House but not the Senate.

**HB 2398** **Reach Code.** Allowed cities and counties to adopt the state Reach Code as the mandatory building code in their jurisdiction, ensuring new buildings had stronger energy efficient standards. Passed the House but not the Senate.

**HB 2479** **Black Carbon.** Modified the definition of “global warming” to include certain aerosol air contaminants, including black carbon, and would have directed the Department of Environmental Quality (DEQ) to estimate black carbon emissions in Oregon and recommend mitigation strategies.

**HB 2488** **Environmental Justice in Land Use.** Amended Statewide Land Use Planning Goals to promote the participation of disadvantaged and historically underserved communities.

**HB 2495** **Toxic Free Kids Act Update.** Updated the existing Toxic Free Kids Act program to align certain definitions with other states, improved efficiency of Oregon Health Plan implementation through removing limits to how many chemicals can be added to their database, and adding brand name and product model for clarity in reporting. Passed the House but not the Senate.

**HB 2558** **Transit Near Housing.** Allowed more housing to be built in residential areas near fixed-route transit, increasing diverse and relatively more affordable housing, reducing household transportation costs and greenhouse gas emissions, and creating a win-win for more livable communities.
Right to Repair. We generate far too much waste, and companies use their power in the marketplace to make things harder to repair—adding to the amount of waste going to landfills. This bill would have given every Oregonian and every small business access to the parts, tools, manuals, and schematics they need to repair products.

Banning Coyote Killing Contests. Would have prohibited any person from conducting or participating in any contest, competition, tournament or derby that involved needlessly killing coyotes for prizes or other inducement, or for entertainment. Passed the House but not the Senate.

Air Quality for Outdoor Workers. Required employers of outdoor workers to track air quality, and ensured their employees were given the protections they needed to continue working outside safely.

BAD BILLS THAT DIED

Gutting Fish Passage Laws. Provided sweeping rollbacks to existing fish passage laws, endangering many threatened and endangered fish species.

Urban Growth Boundary (UGB) Expansion. Allowed premature and unnecessary Urban Growth Boundary expansions into urban reserves, including on to farm, forest, and ranch lands.

Exempt Businesses From Regulations. Changed statutes to exempt small businesses from agency rules altogether under certain circumstances. Statutes already grant businesses special consideration in agency rulemakings—making this bill unnecessary and dangerous.

Predator Control Districts. Repealed the sunset on predator damage control districts established in certain counties in 2015. It would’ve made more financial resources available for counties to contract Wildlife Services to kill predators with no requirement to consider use of non-lethal tools first. Passed the House but not the Senate.

Water Management. Allowed water right holders to develop water management plans that would allow them to self-govern water right permitting, transfers, exchanges, etc., without adhering to existing statutory standards, environmental protections and/or public processes—effectively takes the Oregon Water Resources Department out of a permitting and regulatory role, and instead allowing local control of public waters with minimal oversight.

POWERFUL INTERESTS KILLING IMPORTANT LEGISLATION

FOR FAR TOO LONG, the Oregon Legislature has been a place where powerful corporate interests hold an immense amount of power. Unfortunately, this is still very much the case—and you can easily see the impact with so many important pieces of legislation in the Bill Graveyard. It’s worth a look at two key pieces of legislation where powerful corporate interests stopped meaningful reform.

Logging Industry and Big Ag Stop Good Bills

Oregon’s logging industry has long held a huge amount of sway in the legislature—and they used it in 2021 to stop common sense reform of the corrupt Oregon Forest Resources Institute (OFRI). Using public resources, OFRI deceives Oregonians with misleading ads which falsely show logging activities as environmentally friendly when it is well known that clearcutting is profoundly damaging to streams, habitat, and wildlife. OFRI also tried to stop scientific researchers from influencing policy, leading to a damning audit from the Oregon Secretary of State.

We also saw how powerful agricultural corporate interests are when HB 2358, legislation advanced by our partners Pineros y Campesinos Unidos del Noroeste (PCUN) died in the Ways and Means Committee. HB 2358 would have ensured that farmworkers—who are already vulnerable to unhealthy heat and smoke—would be paid overtime when they work more than 40 hours per week. Farmworkers toil long hours in often dangerous conditions and are dramatically underpaid.

It is long past time that Oregon’s legislature puts people first—before the interests of powerful corporations who mislead and endanger Oregonians.

LEFT: CASSIE WILSON, YOUTH CLIMATE ACTIVIST AND RUNNER-UP IN OLCV’S 2021 PHOTO CONTEST UNDER THE CLIMATE CHANGE CLOSE TO HOME CATEGORY
CLIMATE CHANGE

**HB 2021** 100% Clean Energy for All. This was the major climate bill of the 2021 session—it sets clear, achievable targets for reducing emissions from Oregon's electricity grid, establishes strong labor standards for new clean energy projects, invests in community-based renewable energy projects, and includes provisions to ensure long-term affordability and reliability as we remake our energy system.

**YES** is the pro-environment vote. Passed.

**HB 2475** Energy Affordability. As we transition to a clean energy future, energy must remain affordable for everyone. This bill establishes energy bill protections for low-income utility ratepayers, and supports frontline organizations' engagement at the Oregon Public Utility Commission.

**YES** is the pro-environment vote. Passed.

**HB 2842** Healthy Homes. The Healthy Homes Act establishes a program at the Oregon Health Authority to improve the quality and efficiency of housing stock statewide. It provides $10 million in the first biennium to match the annual spending by community action agencies to help every Oregonian live in a healthier home with lower energy costs.

**YES** is the pro-environment vote. Passed.

**HB 2165** Electric Vehicle (EV) Incentives. The Electric Vehicle Incentives Act establishes low-income incentives for new and used EVs with its Charge Ahead program, and it enshrines utilities' role in installing EV charging infrastructure.

**YES** is the pro-environment vote. Passed.

**HB 2062** Energy Efficient Appliances. We can all agree, energy efficiency is a good thing, and this bill increases energy efficiency standards for new appliances consistent with other West Coast jurisdictions—reducing greenhouse gas emissions and saving money.

**YES** is the pro-environment vote. Passed.

**HB 3141** Energy Trust of Oregon Extension. This bill was crucial for the Energy Trust of Oregon (ETO) to continue its important work. It extends the Public Purpose Charge to ensure utility and ETO programs for renewables and energy efficiency continue, and enables utility customer incentives for purchasing electric appliances.

**YES** is the pro-environment vote. Passed.

**HB 5006** Natural Resources Agencies Budget. Across the board, Oregon's natural resources agencies got more funding this year than they ever have. This was a huge victory for the 2021 session and for our values.

**YES** is the pro-environment vote. Passed.

WILDLIFE AND WILDLANDS

**HB 2728** Prohibiting Coyote Killing Contests. We have been working to pass a bill that prohibits people from conducting or participating in coyote-killing contests for cash or prizes for years. Once again this bill passed the House—but not the Senate—allowing coyote-killing contests to continue in Oregon.

**YES** is the pro-environment vote. Died in Senate after passing House.

WATER AND AQUATIC SPECIES

**HB 2018** Ground Water. In order to better manage Oregon's groundwater, this bill instructs the Oregon Water Resources Department (WRD) to produce and publish groundwater budgets for all major basins in the state. The bill expands groundwater level monitoring, will measure progress in estimating and monitoring ground water levels, recharge, and use, and improves community engagement.

**YES** is the pro-environment vote. Passed.
Change of Use for Stored Water. This legislation clarifies the authority of the Oregon Water Resources Department to allow type-of-use changes for reservoirs. This clarification is necessary to complete the Willamette Basin Reallocation process that, once completed, will benefit fish species protected under the Endangered Species Act.

YES is the pro-environment vote. Passed.

Wake Boat Weight Limit. The use of large, heavier wake boats on a specific section of the Willamette River is causing harm to aquatic ecosystems, damaging fish habitat, and resulting in erosion of riverbanks. This bill limits the weight of towed water-sport motorboats (i.e. wake boats) to a maximum of 4,000 lbs and authorizes an Oregon State Marine Board study.

YES is the pro-environment vote. Died in House after passing Senate.

Toxics Free Kids Act (Update). The original Toxics Free Kids Act passed in 2015 and needs important updates. This bill would have updated the existing program to align certain definitions with other states, improve efficiency of the Oregon Health Association (OHA) by removing limits to how many chemicals can be added to their database, and adding brand name and product model for clarity in reporting.

YES is the pro-environment vote. Died in Senate after passing House.

Safe Public Lands. This bill makes public lands safer for Black, Indigenous, and people of color by prohibiting individuals convicted of hate bias crimes on public lands from using those lands and waters for five years. It would also revoke licenses for recreation uses and prohibit the issuance of licenses for a period of five years.

YES is the pro-environment vote. Passed.

Recycling Modernization Act. Twenty years after Oregon established a statewide recycling system, it was time for an update. This bill overhauls Oregon’s outdated recycling system by building on local community programs and leveraging the resources of producers to create an innovative system that works better for everyone in Oregon.

YES is the pro-environment vote. Passed.

FOR MORE THAN 20 YEARS, the Oregon Conservation Network (OCN) has brought together our state’s environmental organizations to protect Oregon’s natural legacy and ensure a better future for our kids. Together, we determine and support shared Priorities for a Healthy Oregon. We also identify and fight Major Threats to a Healthy Oregon. OCN is coordinated by the OLCV Education Fund and powered by the hundreds of thousands of Oregonians who belong to its member organizations. During the 2021 legislative session OCN had four priorities (one of which was a package of three bills):

THE OREGON CLEAN ENERGY OPPORTUNITY: A package of three bills including 100% Clean Energy for All, the Healthy Homes Act, and the Energy Affordability Act. OCN partnered with the campaign led by frontline and environmental justice organizations to pass these bills which will help our state transition to a clean energy future by 2040 while creating jobs, ensuring that everyone can afford to pay their energy bills, and live in more energy efficient and safer homes.

COMPREHENSIVE WILDFIRE POLICY: The catastrophic wildfires of 2020 set the stage for passing urgently needed comprehensive wildfire policy to help Oregonians be better prepared for and more resilient to future fires.

OREGON FOREST RESOURCES INSTITUTE (OFRI) REFORM: Initially this bill was designed to eliminate this quasi-state agency that is really a de facto mouthpiece for the logging industry. The bill was amended to get it out of committee and, in its final version, cut the agency’s budget in half and would have prohibited misleading advertising.

BUDGET FOR NATURAL RESOURCES AGENCIES: This is a perennial priority and this year we saw one of the healthiest budgets for key agencies like the Water Resources Department and many other state natural resources agencies.

ABOVE: ASHLEY DEWEY, 2021 OLCV PHOTO CONTEST WINNER OF THE PET ADVENTURES CATEGORY.
As we look ahead to 2022, we can see that our next chapter is filled with big opportunities for change, for solutions, and for new leadership. Clean energy is the fastest-growing industry in America, and Oregon in particular is well-positioned to be on the forefront of a just transition to a clean energy economy. To get there, we have to craft the next chapter together. We have to elect leaders who share our values and commitment to climate justice.

Our next governor will be elected in 2022. Will they be a climate champion?

In 2022, we’ll add an additional congressional seat. Will our new member of Congress represent our strong environmental values in Washington, D.C.?

All our state legislative districts will be redrawn, creating big power shifts in Salem. Will we elect strong, pro-climate majorities in the Oregon House and Senate?

These are the questions we need your help to answer. The next year is pivotal in Oregon’s history and in determining our climate future.

Will you join us in 2022 to elect climate champions up and down the ballot and across every region of our state?

The people-power of 2022 will determine the next elected leaders of Oregon. Your vote and your voice are needed. Please sign up to help build people power for 2022 and elect leaders we can count on to advance solutions that center equity and justice, and bring meaningful progress for our health, our economy, our climate, and our future.
